## Max Start 90

Lamb Creep **hn101**

Formulated for early consumption, resulting in faster growth

Gives the touch and bloom while keeping that uniform condition across the ribs

90 grams bovatec to help control coccidiosis

High quality ingredients to develop a healthy rumen for maximum performance

Can be used in combination with your show feed with great results

We at **HIGH NOON FEEDS** understand that there are many good starter creep feeds available today. We also understand that every producer has in mind the ideal way they want their lambs to grow and flesh out at around six weeks of age. **HIGH NOON MAX START 90** is a starter creep that will do that and so much more. Your lambs will start consuming earlier and will grow faster. If you are looking for a creep feed that performs like this and also gives them a great touch and bloom without adding fat cover across the ribs, then MAX START 90 is definitely the creep feed for your program. **MAX START 90** does what its name says, it starts your lambs off at a maximum pace and the 90 is for 90 grams of Bovatec, which will help control coccidiosis. We are sure that you will not find another creep feed available that is any better on total performance or any higher in quality.

### Guaranteed Analysis:

### Feeding Directions

#### Max Start 90 hn101

Active Drug Ingredient

Lasalocid.....30grams/ton

Crude Protein	min	18.0%
Crude Fat	min	4.0%
